# Apple Customers Are Highly Satisfied With Refurbished Products

By: Fanny Oliver

# AGENDA

01 Being data detectives

02 A Customer Satisfaction Score of 90 indicates ‘happy’ clients

03 Customer are satisfied with the Product in General and the Price

04 This is what they are doing well

05 Phone functionality needs improvement for higher CSAT score

06 How can we improve satisfaction?

# Being data detectives

## The Data

- Variables showing: phone type, reviews, satisfaction score, category and problems
- 1 satisfaction dimension (ratings)
- Open text reviews

## Purpose

Given the data, **analyze, extract insights** based on numerical and review texts.
**End goal:** decide how to boost satisfaction with renewed products, pick a phone gift.

## Approach

- Extract review text and ratings from url
- Manually categorize reviews
- Extract insights using customer satisfaction metric (CSAT)

## Limitations and Weaknesses

- No identifier for seller
- Not enough satisfaction dimensions to take into consideration
- Sample size is small as we have just 92 records

# A Customer Satisfaction Score of 90 indicates ‘happy’ clients

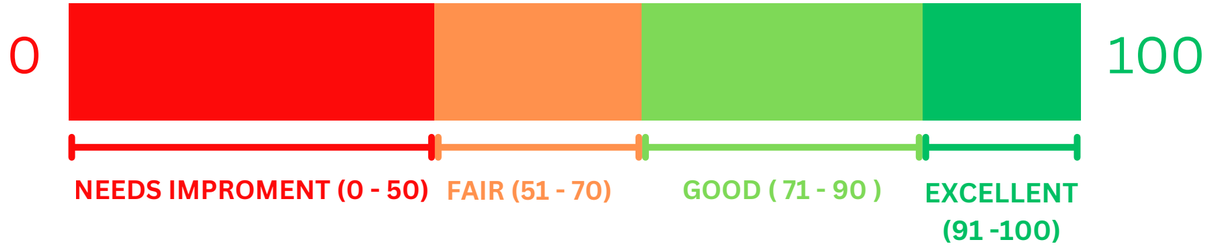
## How will you rate your experience.....

Scale 1-5 (1=not satisfied  at all, 5=very satisfied)

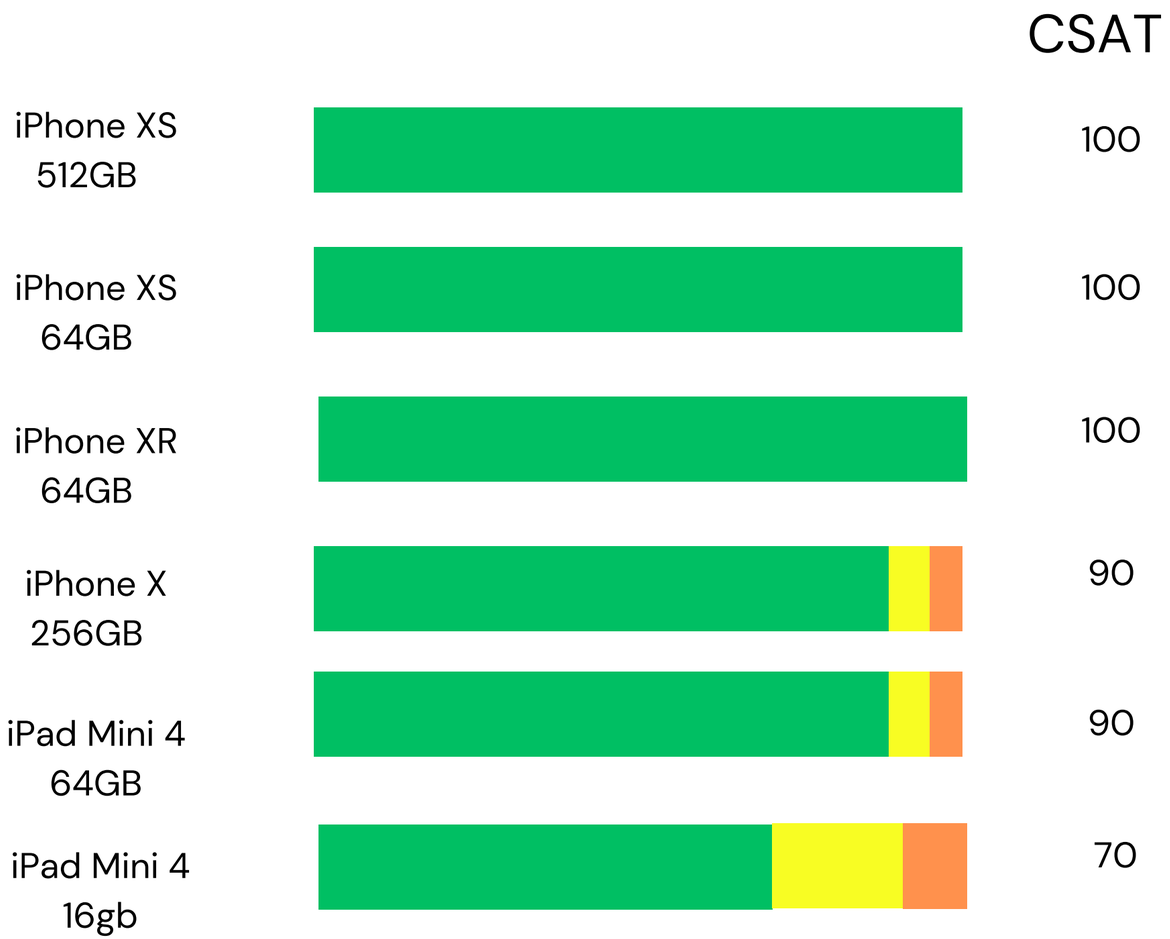
$$\text{CSAT} = \frac{\text{Total number of satisfied customers}}{\text{Total number of response}} \times 100$$

## What is a good CSAT score?

Industry standard is between  70 – 90

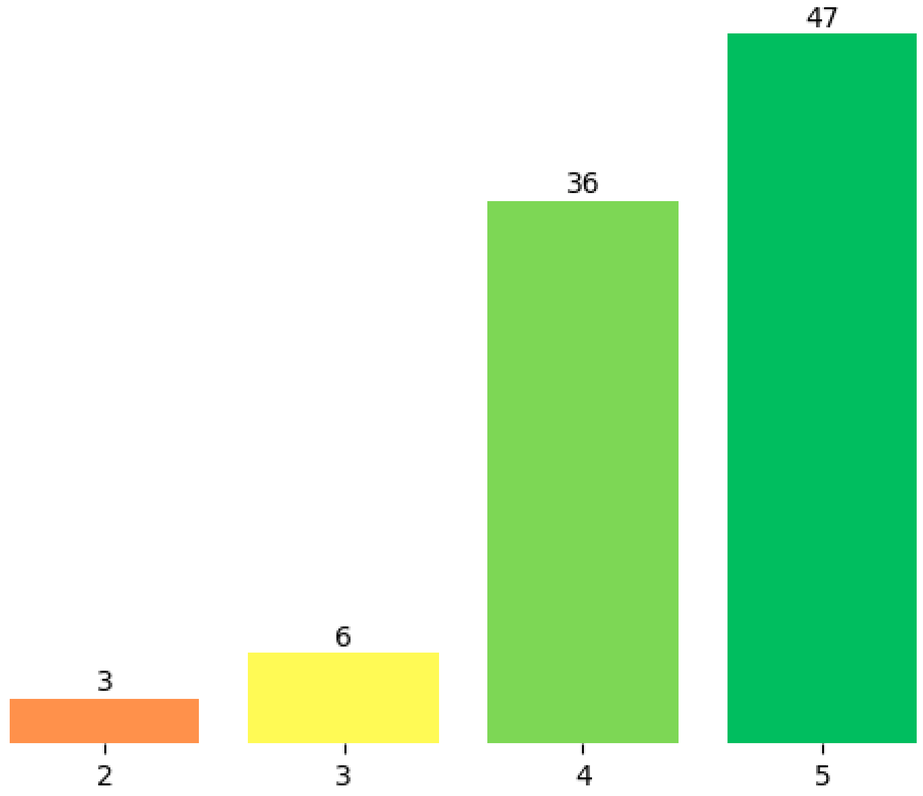


## CSAT by product



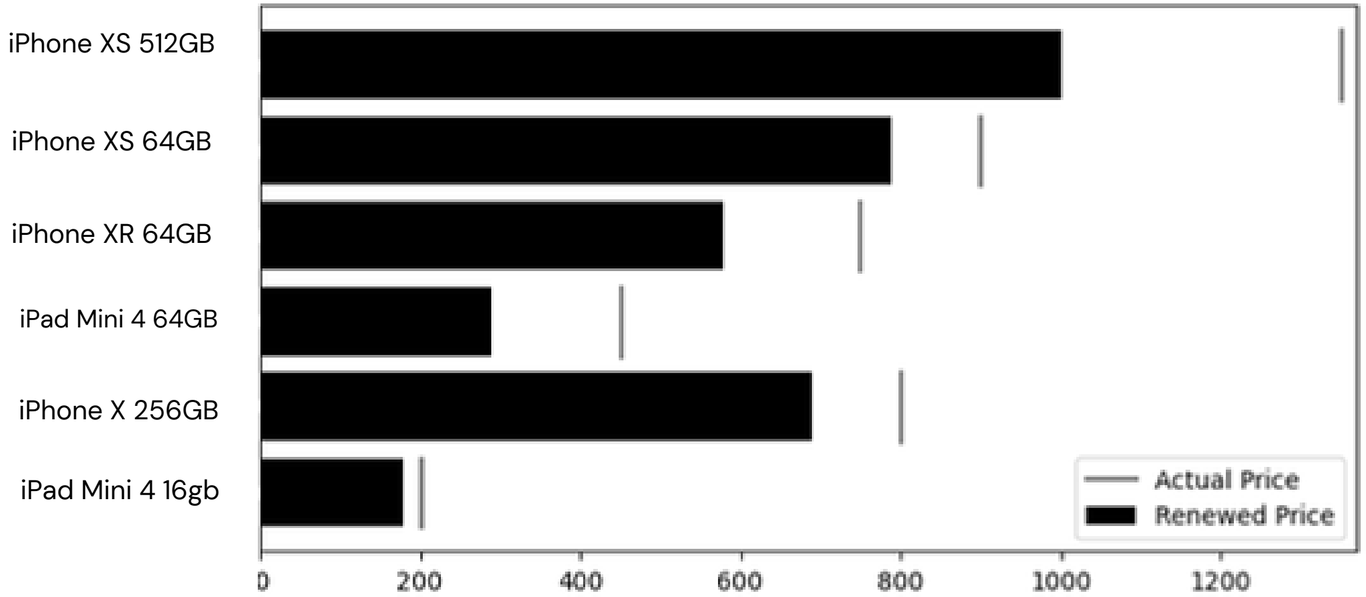
# Customer are satisfied with the Product in General and the Price

## How our clients rated their satisfaction



Customer ratings show that majority of our clients were highly satisfied with the product.....

## Market price exceeds renewed price



.....We can also see that the price range for all the products sold were lower than brand new phones.

Let's see if our clients are happy about this...

# This is what they are doing well

Phone was like new. No problems whatsoever. Very pleased. Transfer of information from old phone was very easy and without problems.

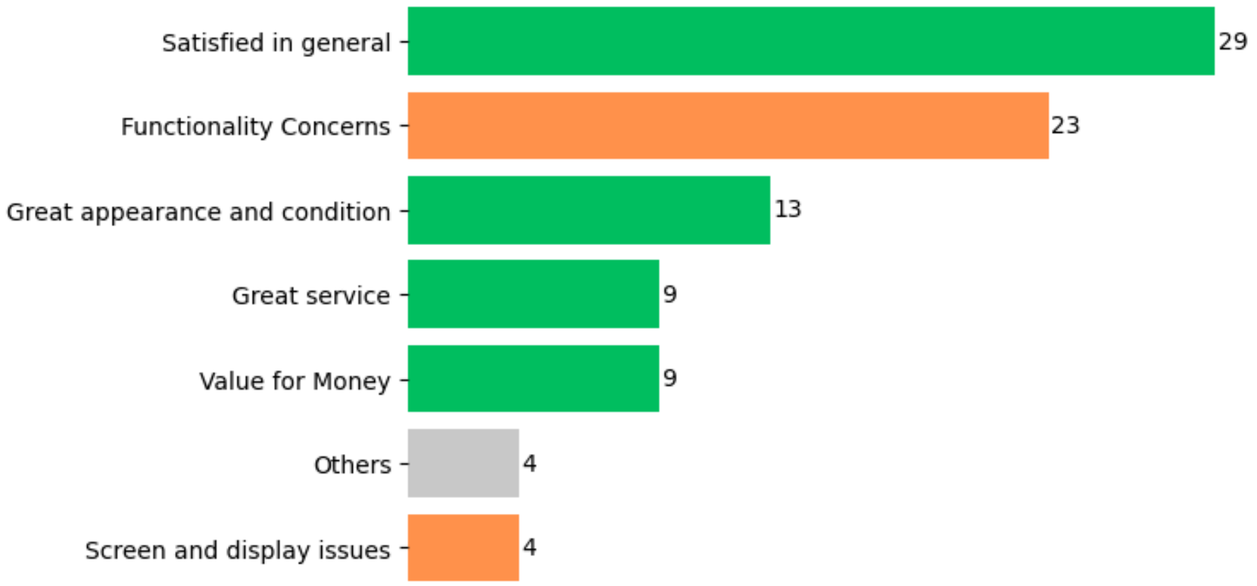
Bought this for my daughter for Christmas and she loves it. Quick delivery and no problems with the product. Would order from here again.

We had a very serious problem with it not working correctly in the company he sent us a new one. Very pleased.

Always a little apprehensive about buying reconditioned electronics. Wanted to let you know the phone was flawless.... Thanks for allowing me to upgrade my phone without draining my bank account.

# Phone functionality needs improvement for higher CSAT score

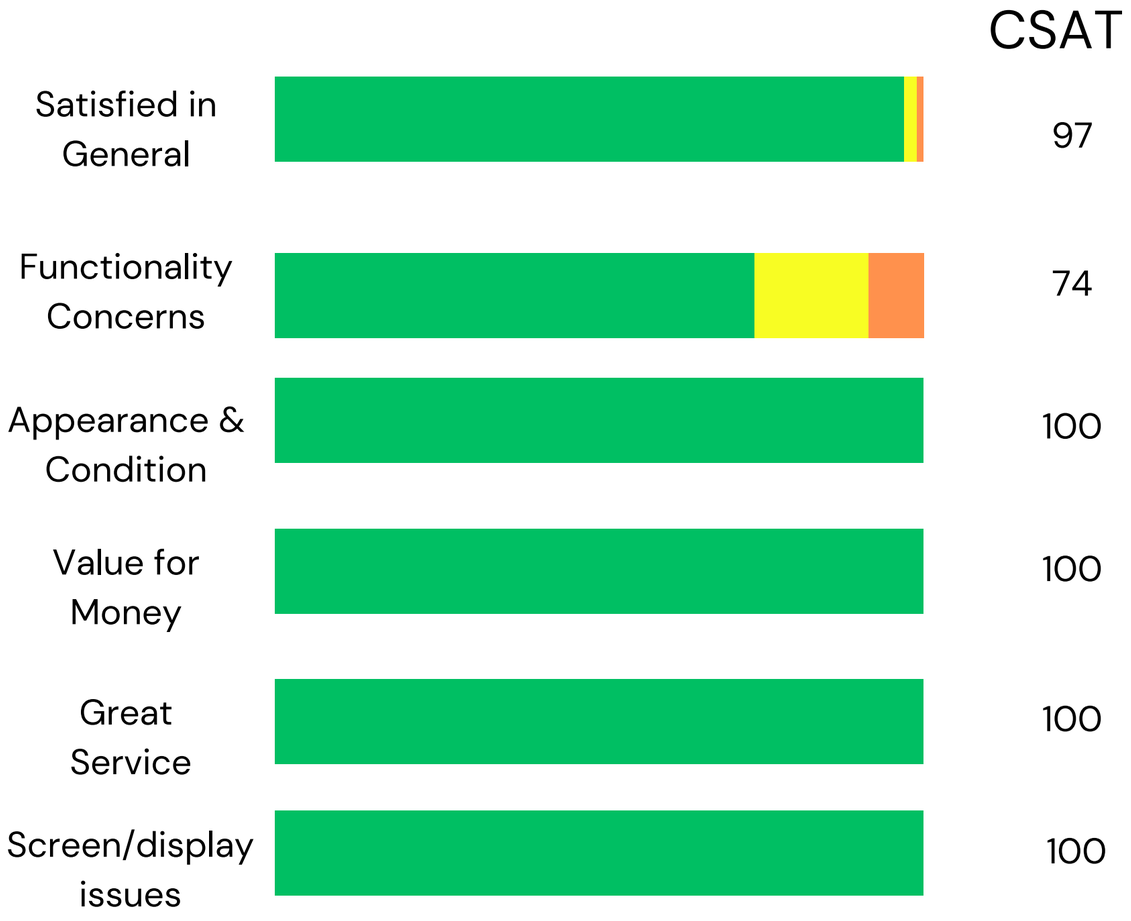
## Summary of Reviews



Although 65% are satisfied with the device and the service....

.....30% expressed dissatisfaction regarding phone functionality like battery, power buttons and speaker issues

## What is dragging the CSAT score down?



# How can we improve satisfaction?

Regularly check **batteries** to ensure they're in good condition and working correctly.

Assess **speakers**; replace if malfunctioning or ineffective.

Check **charging ports** for damage, ensure **chargers** work properly.

Replace **scratched screens**, clean or replace **blurry displays** as needed.

## Thank you For Your Attention!
